

EU Sustainable Energy Week 2019

## Follow us at the biggest EU energy conference

.....

23 of our projects help central European regions to shape their energy future in a greener way.

At the EU Sustainable Energy Week in Brussels this week, we will be talking about a just and fair energy transition on 19 June. We will also share a stand with partners from our projects LOW-CARB, GeoPLASMA-CE, ENERGY@SCHOOL and FIRECE.

Cooperation connects

## Creating a strong network for a greener central Europe

.....

Our 23 low carbon projects are establishing sustainable cooperation linkages from east to west and north to south across central Europe.

The map on the right visualises these linkages created by our projects. The bigger a dot, the more often a region is involved in our projects.

Taking cooperation forward

## Get to know our new energy projects

.....

At the beginning of the year we have selected five new low carbon projects for funding.

In the coming years you will hear regularly about the activities of Store4HUC, ENTRAIN, Efficien-CE, PROSPECT2030 and ENES-CE. They recently kicked off and started working. Expect nothing less than new ideas for reducing the carbon footprint in our central European regions.

Cooperation results

## Find out what our projects have achieved

.....

Cooperation is not a goal in itself. In their partnerships our projects create tangible outputs that can be further used by policy makers and practitioners for real impact in their regions.

Our output library is a free-of-charge online repository where you can find all the knowledge and tools developed by our projects so far.

EU Regions Week 2019

## Save the date and contribute to the future of cooperation

.....

You cannot make it to EU Sustainable Energy Week? How about discussing with us cooperation for a low carbon future at EU Regions Week then?

This key event for regional policy will take place in Brussels on 7-10 October. Contribute to a joint Interreg session with a special focus on energy efficiency. Or help us shape the next Interreg CENTRAL EUROPE Programme 2021-27 in our dedicated programme session.

RegioStars Awards 2019

# Vote now for cooperation in central Europe

.....

Two of our low carbon projects are nominated for the RegioStars Awards 2019. This annual competition rewards excellence and new approaches in regional development.

You can give our projects LOW-CARB and TOGETHER a “Like” and help them win the public choice award or even become a Regiostar! They are competing in Category 4 “Building Climate-Resilient Cities”.
